

# Moboom for Publishers

## Mass Deployment Method

by Gavin Burnett, CEO

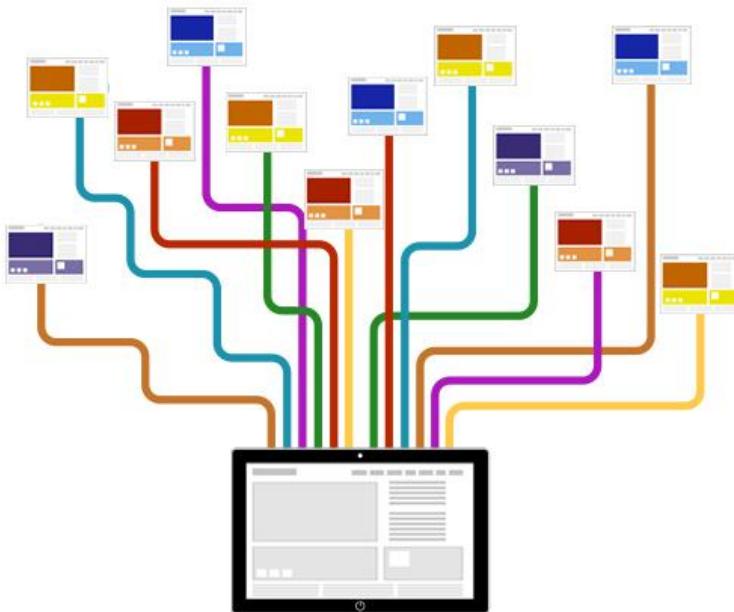

11/18/2013

# Mass Deployment Is...

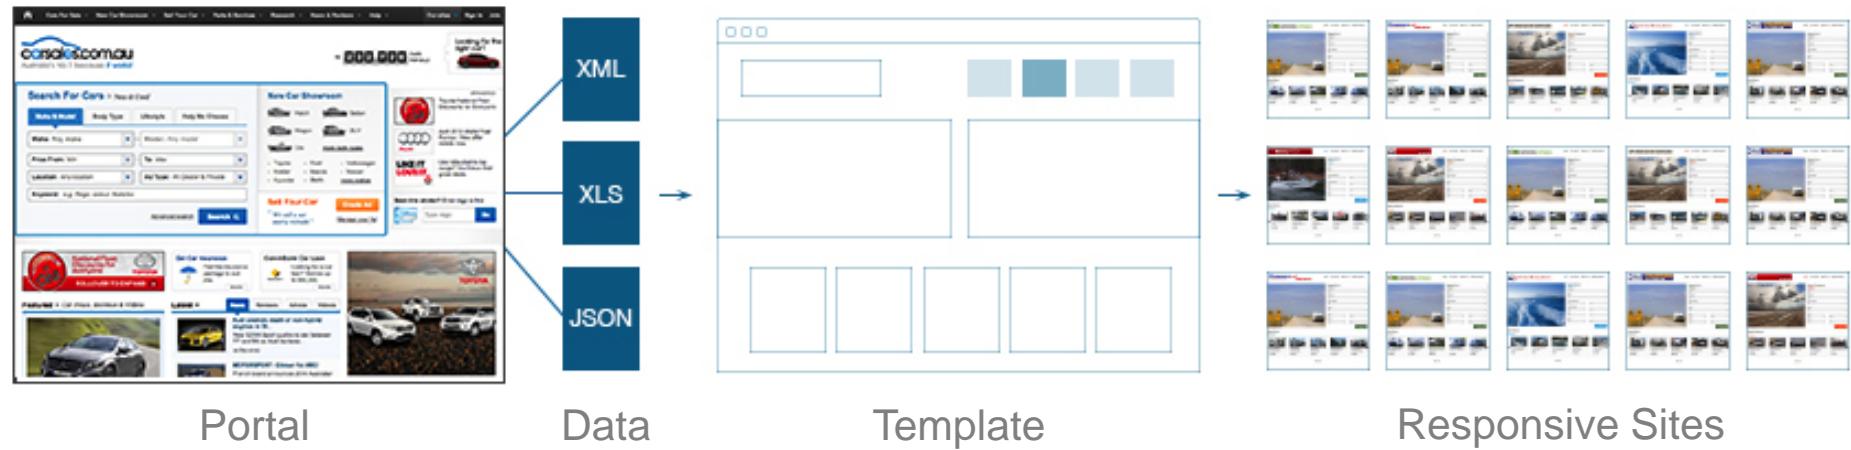

- A way to launch thousands of responsive websites at once.
- A way to scale rapidly while reducing development costs.
- A way to sell your advertisers a website that works on every device.

# Use Mass Deployment If...

- You have a massive database such as automotive or real estate listings.
- You don't want to spend months developing individual websites.
- You want to add new recurring revenue quickly.

# How Mass Deployment Works

Design a single template and import your content to create thousands of websites in minutes.
